

Environmental Policy 2010

Mission Statement:

We will assist individuals and communities within Devon to participate in their own economic and social development through the use of Information and Communication Technologies. Whilst achieving the above, we will not compromise the environment through our use of modern technology, working to increase efficiency and reduce reliance on older inefficient technologies.

To achieve the above we will:

- Comply with the requirements of environmental legislation and approved codes of practice
- Assess the environmental impact of our practices, past present and future to ensure continuous improvement
- Reduce pollution, emissions and waste
- Raise awareness, encourage participation and train employees in environmental management
- Assist customers to use products and services in an environmentally sensitive way
- Liaise with the local community
- Continuously seek to improve environmental performance

We aim to address and update this policy annually, integrating environmental management into our business planning.

Signed: 

Chief Executive

Date: 10th January 2010
